Absolute confidentiality

Guaranteed privacy at all times.

Quick

Flexible medical care with a specialist in Sexually Transmitted Diseases.

From the time the sample arrives in the lab, **results** in:

- **2 hours** for HIV, HPV and Hepatitis B and C.
- **24-48 hours** for Chlamydia, Herpes, Gonorrhoea...

Fast treatment:

- **HIV prophylaxis.**
- Antibiotic administration.
- Treatment of genital warts.

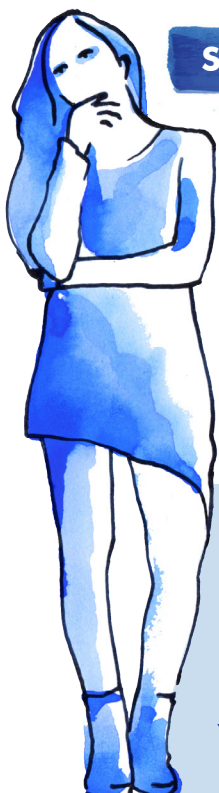

Safe and reliable

The most advanced diagnostic technology available in STDs:

- From one of the few centres with **real-time PCR**, the leading technique in STD detection.
- Allows the **detection of STD pathogen DNA.**
- A much **quicker, more reliable** diagnosis, avoids false negatives.
- Enables **treatment to be targeted** at the microorganism detected.

Specialised STDI centre

- **Team of specialists** in Dermatology and STDs, Microbiology, Pharmacy, Gynaecology, Urology and Nursing.
- **Seamless, direct communication** between professionals for urgent action in positive cases.
- **Guaranteed accuracy**, with specimens collected correctly, appropriate diagnostic tests performed and prescription of effective treatment.
- **Own laboratory and pharmacy**, for immediate diagnosis and treatment.
- **More convenient and calm for the patient**, all performed in the same centre.

Organise a check-up for a Sexually Transmitted Disease if:

- You want to know if you could have an STD.
- You have had unprotected oral, anal or vaginal sex.
- You have previously had an STD.
- You have a genital ulcer, wart or other genital irritation.

- You have a new sexual partner.
- You have had any at-risk sexual practice.
- You have had anal sex and you would like to have anal cancer screening.
