

## Ophthalmological examination

Gathering of medical history and visual symptoms

Autorefractometry and tonometry (Eye prescription and intraocular pressure)

Optometric exam (Refraction test and assessment of visual health)

Diagnostic tests: Structural OCT + Corneal topography + Wide-field retinography + Ocular biometry

Complete eye exam: Examination of the anterior pole (cornea, lens) with a slit lamp and fundus (retina and optic nerve).

Specific tests (as needed): Visual field test, Endothelial cell count or Angio-OCT

## Why choose HC?

Personalised **assessment**, a highly **qualified team** and dedicated **post-operative care**.

**High-precision technology for your eye health:** Ultra-widefield retinography, OCT, OCTA, Autofluorescence, ...

**Specialists in different medical specialties:** ophthalmologists, opticians, oculoplastics, dermatologists, gynaecologists, pneumologists, allergists, internists, etc.
